

# oCam : 5MP USB 3.0 Camera

## How to use oCam on Odroid C2 with Android

It works on Odroid C2 and Odroid C1.  
However, in Odroid C1, the recorded video is strangely colored.

You can use oCam on Android by bypass the Android camera Framework HAL. To do that, you need to use libuvc.

In this example, I used [this project](#). And using the Android Studio make easy to install the examples.

## Download Project

```
$ git clone https://github.com/saki4510t/UVCCamera.git
```
