

ODORID-VU Series

ODROID-VU Series for ODROIDs give users the ability to create all-in-one, integrated projects such as tablets, game consoles, infotainment systems and embedded systems.

The displays connect to ODROID-C2/C1+ via an HDMI link board and a micro-USB link board which handles power and signal.

Just connect a DC plug in to the DC-jack on C2/C1+, and you are ready to play, once you install the latest OS up- date.

This high-quality touchscreens are specifically designed to work with both Android and Linux on the ODROID-C1+, ODROID-C2 and ODROID-XU4.
