1. Initial version
2. Supports fbdev version of Kodi (**apt-get install kodi-fbdev**)
3. If you want to change the CPU governor, install **cpufrequtils** and try the following commands. Don't forget to disable ondemand service.

```
$ sudo apt install cpufrequtils
# You can specify the governor as you want such as ondemand,
performance, powersave, interactive, and so on.
$ echo 'GOVERNOR="{GOVERNOR}"' | sudo tee /etc/default/cpufrequtils;
sudo update-rc.d ondemand disable; systemctl mask ondemand;
$ reboot
```

- e.g. Check the CPU governor if you feel the system slowness. If it is not "performance", try..

```
$ cat /sys/devices/system/cpu/cpu0/cpufreq/scaling_governor
$ echo 'GOVERNOR="performance"' | sudo tee
/etc/default/cpufrequtils; sudo update-rc.d ondemand
disable;systemctl mask ondemand
$ reboot
```
