

## Updating Go-Play | Writing the other Applications

This instructions are available in device firmware version 20180727 or later. [If you need updating the firmware follow this link.](#)

If you want to update GO-Play to the latest version or write other application firmware like MicroPython on ODROID-GO, follow the instructions below.

### Download the Application Firmwares

Download the “.fw” file from the release notes at the link below.

- MicroPython : [https://github.com/OtherCrashOverride/MicroPython\\_ESP32\\_psRAM\\_LoBo-odroid-go/releases](https://github.com/OtherCrashOverride/MicroPython_ESP32_psRAM_LoBo-odroid-go/releases)
- Doom : <https://github.com/OtherCrashOverride/doom-odroid-go/releases>
- Go-Play : <https://github.com/OtherCrashOverride/go-play/releases>

Or make a “.fw” file from Arduino firmware binary

- [Make Arduino Applications for ODROID-GO](#)

### Copy .fw(Application Firmware) file you want to your SD card

Copy a “.fw” file to the “odroid/firmware/” folder.

If you have not set up your SD card for ODROID-GO yet, please refer the link below.

[Make SD card](#)

### Back to the device firmware menu

If the screen looks like the above picture when you **Power Switch** on, follow this.

**Power Switch** Off, Hold **B button**, **Power Switch** On, Release **B button** when device firmware Menu appears.

## Select Application Firmware

Use the **D-pad** and **A button** to select the application firmware.  
To return, press the **B button**.

## Write Application Firmware

Press the **Start Button** to start writing the application F/W.

## ODROID-GO Device Firmware Menu Controls

- **Power Switch** Off, Hold **B button**, **Power Switch** On, Release **B button** when device firmware Menu appears. - Back to device firmware menu from an App
- **A** - Select Application F/W
- **B** - Cancel
- **Start** - Write Application F/W
